

OUTSIDE THE EU

OPTIONS FOR BRITAIN

Edited by Martin Westlake

"As the UK still grapples with its real policy choices outside the EU, here is an excellent, timely volume of crisp, well-written essays which cuts through a lot of the fog of confusion, delusion and misinformation in the national debate. The perspectives are genuinely diverse and come from across the entire European continent – and beyond it. The authors deal with the real trade-offs and dilemmas others outside the EU have faced and the choices they have made when negotiating with it. ... an excellent primer for how to think about the next chapter."
