Call for Papers

Workshop in Empirical Macroeconomics

Business Cycles in a Turbulent Macroeconomic Environment

University of Innsbruck | Liechtenstein Institute | University of Linz

March 18-19, 2027
Liechtenstein Institute, Liechtenstein

Geopolitical fragmentation and unprecedented economic uncertainty are shaping current macroeconomic developments around the globe. This workshop aims to discuss topical research and recent advances in empirical macroeconomics, with a particular focus on challenges arising from the recent business cycle chronology and their implications for fiscal and monetary policy. We invite papers that push methodological and empirical frontiers by making innovative use of macro and/or micro data, as well as state-of-the-art methods.

Keynote

Sarah Lein, University of Basel

Paper Submission

We invite full papers for submission until **January 8, 2027,** here. Notification of acceptance will be sent out by **January 29, 2027**.

Participation fees

We do not charge participation fees, and we are not able to offer travel grants.

Venue

The workshop takes place at the **Liechtenstein Institute**, Liechtenstein, and offers participants a unique opportunity for networking as well as scenic views and tasty food from the region.

Registration and Contact

Upon notification of acceptance, please confirm your attendance at the workshop by **February 12, 2027,** via email to empmacro2027@uibk.ac.at.

Please use the same email address for all queries related to the workshop.
